HOW TO USE

FIRST TIME

If your students have never used mystery pictures before, I suggest modeling how to solve a few boxes. This is the order I teach my students to follow: 1. Solve one box, 2. Write the answer in the box, 3. Use the key to color the box, 4. Repeat. Students love to see the picture unfold before their eyes.

I also recommend using **colored pencils and crayons** rather than markers. If students use markers, you won't be able to read their answers.

WHEN TO USE

Mystery pictures will take your students quite a while to complete. This makes them great for fast finishers! They are also perfect for **reviewing and practicing concepts**. I would NOT recommend using these right after you introduce a concept. If students are not even close to mastery, this activity will be frustrating for them. (One reason I made 3 skills levels is to help all students feel successful).

I have found that students enjoy doing these in groups or by themselves.

HOW TO ASSIGN LEVELS

You could **assign** levels by giving a quick quiz on the concept and then dividing your students into 3 ability levels.

You could also tell the students which group is beginner, intermediate, and advanced and let them **choose** which picture to work on. I have been impressed with my students' desires to challenge themselves. Some students are very motivated when they know they are working on the "advanced" level.
